DETAILED ACTION

Allowable Subject Matter

1. The following is an examiner's statement of reasons for allowance:

The prior art of record fails to anticipate or make obvious the inventions of claims 1-34, including, *inter-alia*, measuring a patient's peripheral vascular function by measuring a peripheral pulse volume per length, measuring blood pressure, and calculating a mathematical function representing the peripheral vascular function using the pulse volume per length and the blood pressure.

Raines (US Patent 6149587) discloses a method of measuring peripheral vascular function comprising measuring the peripheral pulse volume of a subject (column 6, lines 31-36); measuring the blood pressure of the subject (column 6, lines 60-62); and calculating a quantity that is a mathematical function of the patient's vascular function based upon the measured pulse volume and blood pressure (see "Ankle/Arm Index" in Figure 16 – Ankle/Arm Index is an alternate term for Ankle/Brachial Pulse Index, which is the ratio between the systolic arm blood pressure and the systolic ankle blood pressure and is therefore a mathematical function).

Raines does not disclose measuring pulse volume per length, as claimed by the Applicant, and there is no motivation in the art for substituting such a measurement into the calculations.

Marks (US Patent 4548211) teaches measuring a pulse volume that is normalized to segment length (column 5, lines 34-39), but there is no suggestion to use

this measurement for analysis of peripheral vascular function, especially in conjunction with a blood pressure measurement.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
